## EXPERIENCE

## ABT TELECOMS

05/06/2023

Software Developer

-

I am currently working as a Full-Stack developer, also a data analyst and a network engineer. I worked on an insurance company CRM that enhance the effective communication and cut costs between clients and internal employees. The system was created using frameworks like Composer, PHP, Laravel, Node.Js, Vue.Js and programming languages like HTML, CSS, JavaScript, JQUERY, also the database we used was phpMyAdmin.

30/05/2024

I'm also using Microsoft Power BI for data analytics which also include DAX. I am also exposed to networking as we supply connectivity to places that do not have it.

---

## PROJECTS

### Motion Sensor Security System

I was a part of the development team that created a security system that can be used by organizations and households to secure their premises using MongoDB, ReactJS, HTML/CSS, NodeJs, JQUERY
